GOAL OF THE INVESTMENT PROGRAM

The purpose of the Endowment Program is to benefit Unity Presbyterian Church on a long-term basis. It is understood that future giving (contributions) to the Program is expected to be inconsistent, and therefore, unpredictable. Accordingly, it is the objective and intent of the Investment Program is to maintain the purchasing power of all accounts by growing the aggregate portfolio value by at least the rate of inflation as measured by the Consumer Price Index (CPI) over the Program's investment horizon. Any future gifts will serve to further augment the objectives of each Account.

DISTRIBUTIONS

Upon initial establishment of the Program, the Board has set a 3-6% annual spending rate. That rate assumes that over the long term, the Program will average earnings at least 4% over the inflation rate. For periods beginning with calendar year 2017, the annual spending rate formula, a review of actual earnings and a study of expected future conditions, will be used to determine distributions.

SCOPE OF THIS INVESTMENT POLICY

This statement of investment policy reflects the investment policy, objectives, and constraints of the various Accounts belonging to Unity Endowment Program.

PURPOSE OF THIS INVESTMENT POLICY STATEMENT

This statement of investment policy is set forth by the Endowment Board ("the Board") of the Unity Endowment Program in order to:

1. Define and assign the responsibilities of involved parties.
2. Establish a clear understanding of the investment goals and objectives of all Program assets.
3. Offer guidance and limitation to Investment Managers regarding types of allowable investments of Program assets.
4. Establish a basis for evaluating investment results.
5. Manage all Program assets according to acceptable standards and prudence under the prevailing circumstances.
6. Establish the relevant investment horizon for which all Program assets will be managed.

DELEGATION OF AUTHORITY

The Board is responsible for directing and monitoring the investment management of all Program and Account assets. The Board is authorized to delegate certain responsibilities to professional experts in various fields. These include, but are not limited to:

1. *Investment Management Consultant.* A consultant may assist the Board in establishing investment policy, objectives and guidelines; selecting investment managers; reviewing such managers over time; measuring and evaluating investment performance; and other tasks as deemed appropriate.
2. *Investment Manager.* An investment manager has discretion to purchase, sell, or hold the specific securities that will be used to meet the Program's investment objectives. Managers will be held responsible and accountable to achieve the objectives stated herein. While it is not believed that the limitations will hamper investment managers, each manager should request modifications they deem appropriate.
3. *Custodian.* A custodian will physically (or through an agreement with a sub-custodian) maintain possession of securities owned by the Program, collect dividend and interest payments, redeem maturing securities, and effect receipt and delivery following purchases and sales. The custodian may also perform regular accounting of all assets owned, purchased, or sold, as well as movement of assets into and out of the Program.
4. *Additional specialists.* Attorneys, auditors, actuaries, retirement plan consultants, and others may be employed by the Board to assist in meeting its responsibilities and obligations to administer Program assets prudently.

ASSIGNMENT OF RESPONSIBILITY

Each Investment Manager must acknowledge in writing its acceptance of responsibility as a fiduciary. Each Investment Manager will have full discretion to make all investment decisions for the assets placed under its jurisdiction, while observing and operating within the policies, guidelines, constraints, and philosophies outlined in this statement. Specific responsibilities of the Investment Managers include:

1. Making decisions to buy, sell, or hold individual securities, and to alter asset allocation within the guidelines established in this statement.
2. Reporting investment performance results on timely basis as required by the Board.
3. Communicating any major changes to economic outlook, investment strategy, or any other factors which affect implementation of the investment process.

4. Informing the Board regarding any qualitative change in the Investment Manager's organization. Examples include changes in portfolio management personnel, ownership structure, investment philosophy, etc.
5. Voting proxies, on behalf of the Program, unless otherwise requested by the Board.
6. Delegating any duties to one or more agents after providing notice in advance to the Board.

FIDUCIARY INVESTMENT PRINCIPLES

1. Investments shall be made in the best interest of the Account beneficiaries.
2. Investments of the Program shall be diversified so as to minimize the risk of loss.
3. The Board may employ one or more investment managers of varying styles and philosophies to attain the Program's objectives.
4. Cash is to be employed productively, by investment in short term cash equivalents to provide safety, liquidity, and return.

INVESTMENT OBJECTIVES

In order to meet its needs, the investment strategy of the Program is to emphasize a total return concept; that is, the aggregate return from capital appreciation or depreciation and dividend and interest income. **A primary investment management objective** shall be to achieve returns in excess of the rate of inflation in order to preserve purchasing power of Program assets. Risk control is an important element in the investment of Program assets.

A secondary investment management objective shall be to maintain sufficient liquidity to ensure the ability to meet all expected or unexpected cash flow needs by investing in securities which can be sold readily and efficiently.

DEFINITION OF RISK

The Board realizes that there are many ways to define risk. It believes that any person or organization involved in the process of managing the Program assets understands how it defines risk so that the assets are managed in a manner consistent with Program objectives and investment strategy as designed in this statement of investment policy.

The Board defines risk as:

- The probability of losing money over any time period.

- The probability of losing money over the Program's investment time horizon.
- The probability of not maintaining purchasing power over the Program's investment time horizon.
- The probability of not meeting the Program's objectives.

LIQUIDITY

To minimize the possibility of a loss occasioned by the sale of a security needed to meet a payment, the Board will periodically provide Investment Managers with an estimate of expected net cash flow. The Board requires that a minimum of 5% of Program assets shall be maintained in cash or cash equivalents, including money market funds or short-term U.S. Treasury bills.

MARKETABILITY OF ASSETS

The Board prefers that all Program assets be invested in liquid securities, defined as securities that can be transacted quickly and efficiently for the Program, with minimal impact on market price.

In the event that any individual Investment Manager's portfolio violate its specific guidelines, for reasons including but not limited to market price fluctuations, the Board expects that the Investment Manager to bring the portfolio into compliance with these guidelines as promptly and prudently as possible without instruction from the Board.

F. Diversification for Investment Managers

The Board does not believe it is necessary or desirable that securities held in the Program represent a cross section of the economy. However, in order to achieve a prudent level of portfolio diversification, the securities of any one company or government agency should not exceed 5% of the total portfolio, and no more than 20% of the total fund should be invested in any one industry. U.S. Treasury securities may represent 10% of the total portfolio, while the total allocation to treasury bonds and notes may represent up to 100% of the Program's aggregate bond holdings.

SELECTION OF INVESTMENT MANAGERS

The Board's selection of Investment Manager (s) must be based on prudent due diligence procedures. Any manager must be a registered investment advisor under the Investment Advisors Act of 1940, or a bank or insurance company. The Board requires that each investment manager provide, in writing, acknowledgment of fiduciary responsibility to the Program.

INVESTMENT MANAGER PERFORMANCE REVIEW AND EVALUATION

Performance reports generated by the Investment Manager shall be compiled at least quarterly and communicated to the Board for review. The investment performance of total portfolios, as well as asset class components, will be measured against commonly accepted and agreed upon performance benchmarks. Consideration shall be given to the extent to which the investment results are consistent with the investment objectives, goals, and guidelines as set forth in this statement. The Board reserves the right to terminate a manager for any reason including, but not limited to, the following:

1. Investment performance which is significantly less than anticipated given the discipline employed and the risk parameter established, or unacceptable justification of poor results.
2. Failure to adhere to any aspect of this statement of investment policy, including communication and reporting requirements.
3. Significant qualitative changes to the investment management organization.
